

Installing Sharp Print Drivers

WEH 4201= 128.2.218.93	MX-2610N
NSH A007= 128.2.181.19	MX-2610N
NSH 1509= 128.2.181.20	MX-4110N
NSH 1100= 128.2.181.21	MX-4110N
NSH 3102= 128.2.181.22	MX-5111N
NSH 4102= 128.2.181.23	MX-5111N

- 1.) Go to: <http://drivers.sharpidnc.com/driversearch.aspx> and choose the unit model on your floor from the list above. Then choose your computer platform and operating system. You will want to download the **PCL 6 Driver** type.
- 2.) Save the file. It will automatically go to your default download spot, most likely your desktop or the Downloads folder under My Documents. You will then want to double click the file and extract the zip files to your desktop.
- 3.) Click the **START** button and then select the **PRINTERS AND FAXES** option. *(May also be located in the CONTROL PANEL, which is also accessible from the START menu.)*
- 4.) Select the **ADD PRINTER** option.
- 5.) Press **NEXT** on the first screen of the wizard that appears. On the next menu, select the **“LOCAL PRINTER ATTACHED TO THIS COMPUTER”** option, and make sure that the **“AUTOMATICALL DETECT AND INSTALL MY PLUG AND PLAY PRINTER”** option is **disabled**. Press **NEXT**.
- 6.)
 - If you **did not** have the previous mutli-function copier installed on your computer, choose the **“CREATE A NEW PORT”** option, and from the drop down menu select **“STANDARD TCP/IP PORT.”** Press **NEXT**.
 - Press **NEXT** in the new window that appears. In the **“PRINTER NAME OR IP ADDRESS”** field enter the IP address (**see above**). Press **NEXT** and then **FINISH** when the IP address is entered. Proceed to step 8.
- 7.)
 - If you **did** have the previous mutli-function copier installed on your computer, choose the **“USE THE FOLLOWING PORT”** option, and from the drop down menu select **the IP port number that corresponds with your printer listed above**. Press **NEXT**.
- 8.) A new window will appear, click the **HAVE DISK** button on the bottom right. In the next pop-up window select **BROWSE**. Next navigate to your desktop and click the folder extracted earlier and then every **TOP** folder within it until you reach the file SS0EMENU.inf Then select MX-2610N, MX-4110N or MX-5111N **based on description above** and press **NEXT**.
- 9.) The wizard will walk you through naming the printer; you can change the name if you would like. Continue through the wizard until it is completed.
- 10.) The printer should now appear in the **PRINTERS AND FAXES** menu. Right click on the printer and select **PRINTING PREFERENCES**. Select the **JOB HANDLING** tab on the top of the new window. Check the box for **USER NUMBER** and enter your 5-digit copy code. Press **OK** and *this will prevent you from entering your code each time you print.*
